

IN THE SPECIFICATION:

Please replace the paragraph beginning on page 7, line 22 and ending on page 7, line 30 with the following paragraph:

Before discussing Fig. 2, a brief discussion of terminology is needed. In accordance with an exemplary embodiment of the present invention, the installer program module 37 recognizes three principal elements: products, features and components. The installer program module 37 is also described in co-pending application serial no. 09/158,125, entitled "Use of Relational Databases for Software Installation", which is assigned to the same assignee, filed on September 21, 1998, and incorporated by reference herein.

IN THE CLAIMS

Please amend the claims 10 and 18-20 and add new claims 21- 28 as set forth below (all claims provided for convenience):

1. (Original) A method for identifying application functionality needed to run a set of files when a computer is disconnected from a network, the method comprising the steps of:
for each file in the set of files identifying a handler routine and sending each file to the identified handler routine; and
for each file in the set of files, in the identified handler routine, determining the application functionality required to execute each file.
2. (Original) The method of Claim 1, wherein the application functionality comprises products, features and components.
3. (Original) The method of Claim 1, further comprising the steps of:
identifying the set of files; and
storing the set of files on the computer.
4. (Original) A method for identifying a set of files and application functionality needed to run the set of files when the computer is disconnected from a network, the method
